

Product Overview

The **Heavy Duty Releasable Pulling Tool** is a **collet-type pulling tool** designed to **latch onto and retrieve wireline tools with badly damaged external fishing necks**. Its robust construction provides **full 360-degree engagement** with the fishing neck for maximum holding strength during recovery operations. The tool can be **released by downward jarring**, provided there is a solid footing for the core to drive against, making it an effective solution for demanding wireline fishing applications.

Key Features

- Collet-type pulling tool for secure engagement with external fishing necks.
- Designed to retrieve tools with **badly damaged or worn fishing necks**.
- **Full 360-degree engagement** provides maximum gripping and pulling reliability.
- Heavy-duty, robust construction for demanding wireline fishing operations.
- **Releasable by downward jarring** when a solid footing is available.
- Available in multiple sizes to accommodate a wide range of fishing neck dimensions and wireline applications.
