

Product Overview

The **X Check Set Tool** is used to ensure that **X and R Locking Mandrels** have been properly set in the appropriate landing nipple.

A **sheared pin** in the tool, after it has been run, indicates that the locking mandrel has been properly set. The tool is lowered downhole to the locking mandrel using standard wireline tools.

Key Features

- **Setting verification:** Confirms that the X and R Locking Mandrels have been properly set.
- **Positive indication:** A sheared pin provides an indication that the lock has been properly set.
- **Downhole operation:** Designed to lower the downhole to the locking mandrel
