

Product Overview

The **Motor Head Assembly** is used as a **multi-function tool**, primarily run with a downhole motor in conjunction with a **coiled tubing connector**, **dual BPV**, and **hydraulic disconnect**. Using the Motor Head Assembly reduces the overall length of the tool string, thereby reducing the required length of the lubricator.

Key Features

- **Multi-function tool** for coiled tubing applications.
- Primarily used with a **downhole motor**.
- Can be run in conjunction with a **coiled tubing connector**.
- Incorporates/works with a **dual BPV** and **hydraulic disconnect**.
