

Product Overview

The **Roll-On Connector** is designed to attach coiled tubing to the tool string. The coiled tubing is secured to the connector by **crimping the outside diameter (O.D.) of the coiled tubing**. Its design provides a streamlined connection while maintaining pressure integrity and allowing flow through the connector.

Key Features

- **Flush O.D. design** for easy spooling.
- **O-ring seals** provide pressure integrity of the coiled tubing connection.
- **Relatively large I.D.** permits flow through the connector and accommodates plugs, darts, or process balls.
- **One-piece construction** for a simple and robust design.
- **Simple installation** in field applications.

Technical Data

Coiled Tubing Max. OD	Make-Up Length
1-1/4"	8.00"
1-1/2"	8.00"
1-3/4"	8.00"
2"	8.00"
2-3/8"	8.00"
