

## Product Overview

**Straight Bars & Weight Bars** are used in coiled tubing operations to extend short tool strings, provide smoother access through restrictions, and add weight between a jar and an accelerator. They feature a full-flow-through bore and are available in different lengths and weights. The tools are suitable for cleanout, nitrogen lift, and fishing and retrieval operations, including sweet and sour service (H<sub>2</sub>S).

## Key Features

- Extends short tool strings for **smoother access through restrictions**.
- Adds **weight between a jar and accelerator**.
- **Full-flow-through bore**.
- Available in **different lengths and weights**.
- Suitable for **cleanout operations**.

## Technical Data

| O.D. (in) | I.D.* (in) | Length* (ft.) |
|-----------|------------|---------------|
| 1.500     | 0.688      | 2, 3, 4       |
| 1.688     | 0.688      | 2, 3, 4       |
| 1.750     | 0.875      | 2, 3, 4       |
| 2.125     | 1.250      | 2, 3, 4       |
| 2.568     | 1.375      | 2, 3, 4       |
