

Product Overview

The **Paraffin Scratcher** is a wireline cleaning tool designed to remove **paraffin deposits** from the internal diameter of production tubing, nipple profiles, and other downhole restrictions. The tool utilizes hardened wire scratchers that scrape accumulated wax deposits from the tubing wall, helping restore full bore access and improve the passage of subsequent wireline tools. It is available in **standard** and **flared-type** configurations to suit different cleaning applications.

Key Features

- Removes paraffin and wax deposits from tubing I.D.
- Suitable for cleaning nipple profiles and tubing restrictions
- Available in standard and flared-type configurations
- Hardened wire scratcher construction
- High-strength alloy steel body
