

Product Overview

The **Solid Wirefinder** is a wireline fishing tool designed to **bend or ball the uppermost end of a broken wireline** inside the wellbore. Once the broken wire has been balled, it can be effectively engaged by a **Wireline Grab** and retrieved to the surface. The Solid Wirefinder is manufactured from high-strength alloy steel and is available in multiple sizes to suit different tubing and wireline fishing applications.

Key Features

- Designed to bend or ball broken wireline
- Used prior to Wireline Grab operations
- High-strength alloy steel construction
- Precision-machined solid wirefinding head
