

Product Overview

The **Tubing Broach** is a wireline intervention tool designed to remove **burrs left after perforating** and to broach through restrictions inside production tubing. It is also used to remove **scale, rust, and other deposits** from the tubing I.D., restoring a smooth internal bore and ensuring unrestricted passage for subsequent wireline tools.

Key Features

- Removes burrs created after perforating operations
- Broaches through tubing restrictions
- Removes scale, rust, and internal deposits
- High-strength alloy steel construction
- Precision-machined cutting profile
