

Product Overview

The **Tubing Gauge Cutter Ring Set** is a wireline service tool designed to function as a standard gauge cutter while allowing different-size gauge cutter rings to be interchanged on a standard carrier. This interchangeable design provides flexibility for operations requiring gauge cutters across a range of diameters and helps reduce the need to maintain a large inventory of individual gauge cutters.

Key Features

- **Interchangeable gauge cutter rings** — Different cutter sizes can be fitted to a standard carrier.
- **Wide size coverage** — Available for size ranges of **1.0–1.5 in**, **1.5–3.0 in**, and **3.0–6.0 in**.
- **Standard wireline application** — Designed to operate as a standard gauge cutter.
- **Inventory reduction** — One standard carrier can accommodate different cutter sizes, reducing the requirement for maintaining numerous complete gauge cutters.
- **Multiple connection options** — The documented configurations include **15/16–10 UN** and **1-1/16–10 UN** top connections.
- **Multiple fishing neck sizes** include fishing neck O.D. sizes of **1.187**, **1.375**, and **1.750 in**.

Technical Data

Size Range (in)	Fishing neck O.D. (in)	Top Connection
1.0 – 1.5	1.187	15/16 – 10 UN
1.5 – 3.0	1.375	15/16 – 10 UN
3.0 – 6.0	1.750	1-1/16 – 10 UN
