

Product Overview

The **Wire Finder Grab** is a wireline fishing tool designed to retrieve **broken wireline** from the wellbore. It operates in the same manner as a standard wireline grab but incorporates an **integral skirt** that reduces the possibility of passing over the upper end of the broken wireline. This design improves engagement efficiency and enhances the success rate of wireline fishing operations.

Key Features

- Designed for broken wireline retrieval
- Integral skirt improves wireline engagement
- Reduces the chance of passing over the broken wireline
- High-strength alloy steel construction
- Precision-machined gripping assembly
