

Product Overview

The **Wireline Grab** is a fishing tool designed to **engage and retrieve broken wireline** from the tubing during wireline fishing operations. Depending on the tool size, it is available with **two to four gripping prongs**, providing secure engagement of the broken wireline for retrieval to the surface. The tool is manufactured from high-strength alloy steel and is suitable for a wide range of wireline intervention applications.

Key Features

- Designed for broken wireline retrieval
- Available with **2 to 4 gripping prongs**
- Secure wireline engagement
- High-strength alloy steel construction
- Precision-machined gripping assembly
