

Product Overview

The **Alligator Grab** is a wireline fishing tool designed to catch and retrieve loose objects from within the wellbore. The tool features adjustable jaw pressure, allowing the operator to set the gripping force by adjusting the spring tension before running the tool into the well.

The Alligator Grab is intended for light-duty fishing applications and should **not** be subjected to heavy jarring operations once the jaws have engaged a fish. It is available in a range of sizes with standard fishing necks and pin thread connections to suit various wireline operations.

Key Features

- Adjustable jaw pressure through spring tension
- Designed for retrieving loose objects from the wellbore
- Reliable gripping mechanism for light-duty fishing operations
- Available in multiple outside diameters
