

## Product Overview

The **Blind Box** is a wireline fishing tool designed for applications requiring **heavy downward jarring** to dislodge a stuck fish or drive through obstructions encountered within the tubing string. Its solid, impact-resistant construction efficiently transfers jarring force to the obstruction, making it an essential tool for restoring access and assisting subsequent fishing operations. The Blind Box is available in multiple sizes to accommodate a wide range of tubing applications.

## Key Features

- Designed for heavy downward jarring during wireline fishing operations.
- Used to dislodge stuck fish from the tubing string.
- Effective for pushing through downhole obstructions.
- Solid, rugged construction for reliable impact transmission.
