

Product Overview

The **Magnetic Fishing Tool** is designed to recover **small metallic objects and loose metal fragments** from the top of downhole tools during wireline fishing operations. Utilizing a high-strength magnetic element, the tool provides a simple and effective method of retrieving ferrous debris that cannot be recovered mechanically. Its robust construction and compact profile make it suitable for a wide range of wireline intervention and fishing applications.

Key Features

- High-strength magnetic assembly for efficient recovery of ferrous objects.
- Designed to remove small metal fragments from the top of downhole tools.
- Ideal for wireline fishing and intervention operations.
- Compact and rugged construction for dependable downhole performance.
