

Product Overview

The **Pump-In Sub** is installed between the wireline BOP and the wellhead. It provides a dedicated side-entry point for introducing fluids into the well while the BOP remains closed.

It can also be used for **chemical/inhibitor injection and fluid sampling** during well servicing operations. The sub features **Quick Union connections at the top and bottom**, along with a **side outlet fitted with a wing-union connection**.

Technical Data:

I.D. (in.)	Working Pressure (PSI)	Service
2.50	5,000	Standard
2.50	5,000	H ₂ S
2.50	10,000	Standard
