

Product Overview

The **Wireline Cross Overs** are used to **connect wireline tool strings having different thread types**. They provide a practical way to adapt between different **pin and box connections**, allowing components with dissimilar threads to be assembled into a compatible tool string. **Box-by-box and pin-by-pin crossover configurations** are also available on request, and quick-lock connections can be provided.

Key Features

- Connects wireline tool-string components with **different thread configurations**.
- Available in a wide range of **pin-to-box thread combinations**.
- Supports standard **UN thread connections**.
- **Box-by-box and pin-by-pin** crossover configurations available on request.
- **Quick-lock connection** options are also available.
- Multiple outside diameters and fishing-neck dimensions support different wireline tool-string sizes.
